WORK EXPERIENCE

FULL STACK SOFTWARE ENGINEER

Los Andes - E.S. | Brownsville, Texas, United States (Remote)
January 2024 - Present

- Develop REST APIs and software solutions, ensuring seamless communication between services and scalable system architecture.
- Maintain and optimize web applications for customer and user management, inventory control, account administration, invoicing, and payment processing, focusing on performance and user experience.

SYSTEMS AND DATABASE ADMINISTRATOR

TS Network | Brownsville, Texas, United States (Remote)
January 2024 - Present

- Designed and managed the company's database, establishing relationships between tables and ensuring data normalization.
- Monitored call logs to optimize system performance and maintained accurate client, sales, and payment records through regular updates.

FULL STACK DEVELOPER

Self-employed (Hybrid)
January 2022 - January 2024

- Developed websites, software solutions, and cross-platform applications tailored to client needs, focusing on high-quality results.
- Designed and managed databases, web layouts, and user interfaces, ensuring optimal performance and scalability.
- Collaborated with clients to define requirements, set development timelines, and deliver maintainable, efficient solutions.
